About:

“Feed Me Now” is a web development project aimed at catering to the needs of school students by providing them with a convenient platform for accessing meals within their educational environment. Along with this the project focuses in managing the food orders and space availability in the canteen. This project creates a responsive and intuitive web application that caters to the diverse needs of both customers and restaurant partners.

Tech Stack:

MongoDB, ExpressJS, ReactJS, NodeJS, CSS

Features:

1. Register/login (also has google authentication)
2. Delivery system

- 
3. Personalized user profile for students and staff
 4. Payment Gateway
 5. Feedback and rating system

External Libraries:

1. OAuth2.0
2. Bootstrap
